

<i>Theme 1: Social isolation and loss of independence.</i> <i>Theme 1.1: Desire to connect with peers.</i>
<i>Theme 2: Uncertain sense of the future and a need for conversations around survivorship, long-term and late effects.</i>
<i>Theme 3: Greater control over discussions with the care team.</i>
<i>Theme 4: Need for additional navigational and social/caregiver supports.</i>
<i>Theme 5: Developing an inclusive AYA space in the hospital</i>
<i>Theme 6: LGBTQ+ AYAs experience distinct concerns.</i>

Table 1: Concept elicitation via focus group identified six novel themes and one sub-theme that informed the development of novel constructs for the PRO-AYA.
