

**Table 1.** All non-benign STS subtypes seen at the National Cancer Centre Singapore from 2012-2021

<b>STS subtypes</b>
Abdominal fibromatosis
Alveolar rhabdomyosarcoma
Alveolar soft part sarcoma
Angiomatoid fibrous histiocytoma
Atypical fibrous histiocytoma
Cellular fibroma
Clear cell sarcoma NOS
Dedifferentiated liposarcoma
Dermatofibrosarcoma NOS
Desmoplastic small round cell tumour
Embryonal rhabdomyosarcoma NOS
Epithelioid haemangioendothelioma, malignant
Epithelioid sarcoma
Fibromyxosarcoma
Fibrosarcoma NOS
Gastrointestinal stromal sarcoma
Giant cell fibroblastoma
Giant cell tumour of soft parts NOS
Granular cell tumour, malignant
Haemangioendothelioma NOS
Haemangiosarcoma
Infantile fibrosarcoma
Kaposi sarcoma
Leiomyosarcoma NOS
Liposarcoma, well differentiated
Malignant myoepithelioma
Malignant peripheral nerve sheath tumour
Malignant rhabdoid tumour
Mixed tumour, malignant NOS
Myofibroblastic tumour NOS
Myofibroblastic tumour NOS, malignant
Myofibromatosis
Myxoid liposarcoma
Perineurioma, malignant
Peripheral neuroectodermal tumour
Pleomorphic liposarcoma
Pleomorphic rhabdomyosarcoma, adult type
Small cell sarcoma
Smooth muscle tumour of uncertain malignant potential
Solitary fibrous tumour, malignant
Spindle cell haemangioendothelioma
Spindle cell rhabdomyosarcoma
Spindle cell sarcoma
Synovial sarcoma NOS
Synovial sarcoma, biphasic
Synovial sarcoma, spindle cell
Undifferentiated sarcoma
