

**Table 1** – Analyzed levels of vitamin A, vitamin E, vitamin B<sub>6</sub>, vitamin C, copper, manganese, and selenium in the experimental diets.

Ingredients	Amount (%)	
	CTR	TRT
Vitamin A, IU/kg	9 670	15 670
Vitamin E, mg/kg	45	405
Vitamin B <sub>6</sub> , mg/kg	1.9	24.7
Vitamin C, mg/kg <sup>1</sup>	-	2 760
Copper, mg/kg	34	134
Manganese, mg/kg	103	259
Selenium, mg/kg	0.5	1.1

Added per kilogram of feed: 1500 IU vitamin D, 2.6 mg vitamin K, 2.7 mg thiamine, 4.9 mg riboflavin, 31 mg niacin, 21 mg pantothenic acid, 400 mg biotin, 10 mg folic acid, 25 µg vitamin B<sub>12</sub>, 2 mg iodine.

<sup>1</sup> Considering that vitamin C is not usually used in regular breeding/gestation diets, the indicated values represent 10 times the levels reported from an industry survey (Flohr et al., 2016; J Swine Health Prod. 24:290-303).
